** BRAZIL. 9818.54, May 17 at 0552, JBA carrier, no doubt R. Nove de Julho, which rarely achieves any audible modulation direct to here and may have been missing for a while. Varies slightly always considerably to minus side of nominal 9820 (Glenn Hauser, OK, WOR)

** CUBA. 5025, May 20 at 0158, R. Rebelde is off; had been fairly reliable lately but weaker. Something`s wrong at RadioCuba (Glenn Hauser, OK, WOR)

** CUBA. 5025, May 20 at 0635, R. Rebelde is on again, music S9+20 but so is the noise level. Earlier at 0158 check, it was off (Glenn Hauser, OK, WOR)

** CUBA [and non]. Glad to have a report from a listener inside Cuba!:

``Report about Radio Marti on AM from Cuba. Pavel Milanes Costa (CO7WT) Sat, May 17 at 4:51 AM --- Hi, Pavel, CO7WT from Camagüey, Cuba, about Radio Martí on AM on your World of Radio 2295 May 15 2025. Radio Martí is heard routinely on Cuba on AM on 1180 kHz, there are some funny situations that made that possible.

There is no secret on the long Cuba's energy crisis, and as you may expect the local time 1700 (5pm) to 2100 (9pm) and sometimes up to 2300 (11pm) or later is the high demand period and they can't supply the demand; then most of the country [but Havana, that is protected at all costs] got routinely blackout at that times.

As a result a few of the local AM transmitters get powered from diesel generators sometimes at reduced power; or usually just shut down altogether. Lately the AM transmitters are just powered off during the mentioned period and local diesel power is reserved for FM stations [also on reduced power].

So, almost every province has an AM transmitter on 1180 kHz to jam the Radio Martí one, but some AM listeners got a surprise when instead of Radio Rebelde or a local station on the memory of his radio or they dial spot get Radio Martí, mind the surprise of the listeners ?

Attached is a recording of right now, local Radio Rebelde Transmitter off and Radio Martí is coming strong, and here you have a picture of the SDR waterfall. {visible in the WOR iog}

Receiver is a SDRplay with a 15m `long wire` connected to a 9:1 transformer for SW and MW monitoring, but you can pick it up decently with almost any AM radio, my PL-880 on local setting has no problem to hear Radio Martí on 1180 kHz most of the time.

Note: the heavy wiggly noise on the waterfall is my Battery inverter system that makes some noise, but even with that noise it's easily received, at this time the level of RM is down a little but around 8 pm local it's very strong here.

So, with the blackouts they are turning off the jamming stations and at least in Camagüey Cuba it's normal to hear it with battery operated radios.

73 and 88, a long time listener of your programs and lately an avid SW/MW listener.``

Tnx, Pavel! More about him here:
https://www.qrz.com/db/CO7WT
(Glenn Hauser, OK, WOR)

** CUBA. 9790, May 18 at 0218, no signal from CRI relay, which had been more reliable than RHC itself, other than insufficient modulation. Something`s always wrong at RadioCuba (Glenn Hauser, OK, WOR)

** MADAGASCAR. 15400, Sat May 17 at 0557, M&W alternating unknown language, S7/S9 direct, the SSOB and would be the OSOB were it not for slightly weaker 15770 WRMI. 0559 I hear BBC mentioned more than once as part of web address, and off*. Yes, it`s KNK languages which means Kirundi / Kinyarwanda, Saturday from 0530, Sunday from 0500, via Talata. I always wonder exactly how such broadcasts are handled: languages certainly related but applying to opposite genocidal ethnicities: yet strictly separated by time segments, or mixed? (Glenn Hauser, OK, WOR)

** MOLDOVA. 13730.011+, May 19 at 1551, Russian S9+25/35 into UTwente; 5+1 timesignal to 1600, silence and off some seconds later. Another test of Vesti FM from Grigoriopol` site in Russian-occupied Moldova, a.k.a. Pridnestrovye/Transnistria. Also heard widely in N America, tnx to Alexander Miatlikov, Ukraine tip:

``Another round of SW tests from Grigoriopol–Mayak tx site in Moldova/Transnistria towards the Chukotka Autonomous Okrug in the Far East.

May 19 on 13730 kHz
10.00–11.00 UTC
15.00–16.00 UTC
19.00–20.00 UTC

May 20 on 15175 kHz
11.00–12.00 UTC
16.00–17.00 UTC
20.00–21.00 UTC

May 21 on 17505 kHz
10.00–11.00 UTC
15.00–16.00 UTC
19.00–20.00 UTC

300 kW, 16 degrees
https://t.me/s/powerfulradio/290

P.S. Last time, this source also claimed the power was 300 kW, while a worker of that tx site wrote on radioscanner.ru/forum that it was 500 kW. Maybe it's 500 kW now too`` (Glenn Hauser, OK, WOR)

** MOLDOVA. 15175, May 20 at *1957 carrier on, 1959 some mod, and 5+1 timesignal to 2000, Russian ``Novosti`` = news. Another test of Vesti FM for DVR from Grigoriopol`. Surprised at the wide interest in these from monitors in North America and Europe. Only S9/+5 into UTwente vs OTH radar clickery already running between ~15150 and 15175 (Glenn Hauser, OK, WOR)

** NEW ZEALAND. 11725 // 13690, May 18 at 0648, RNZP on two AM frequencies at once! Anomaly? 11725 is S8/9+25 while 13690 is only S6/S9. What does their websked now show?
00:00 – 05:58 17675 Updated 11 May 2025 Pacific Daily;
05:59 – 07:58 13690 Pacific Daily;
07:59 – 10:58 9700 + 11725 Pacific Daily;
10:59 – 12:58 9700 + 11725 Vanuatu, Solomon Islands, PNG Daily
(Glenn Hauser, OK, WOR)

** NEW ZEALAND. 13690, May 19 at 0618, RNZP only here, not also on

11725 as was the case last night at 0648. Sked calls for 13690 only until 0758, then 11725 plus 9700 (Glenn Hauser, OK, WOR)

** NEW ZEALAND [and non]. 11725, May 20 at 0631, RNZP S9 here only, not on 13690 like last night, where supposedly sked until 0758. It`s the SSOB and except for JBA 11700 FRANCE, the OSOB (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6925- AM, May 18 at 0209, pirate music, still at 0232; slightly low in frequency. These say Liquid Radio, logs before and after these times as plain old 6925: https://www.hfunderground.com/board/index.php/topic,145147.0.html (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6938 AM, May 18 at 0208 and still 0232, open carrier vs HSNL; at least I can`t make out any mod if it be a pirate? Nothing now reported in HFU, tho lots of older logs, unIDs, USB or AM (Glenn Hauser, OK, WOR)

** OKLAHOMA. 1670, May 16 at 2214 UT, Virtual DJ Radio, central Enid, audible at home, BFO revealing carrier is unstable tho sounds OK on AM caradio when closer to it (Glenn Hauser, Enid, WOR)

** OKLAHOMA. 87.9, May 18 at 1608 UT, nearby dead air in $tereo is on again, idle feeder? (Glenn Hauser, Enid, WOR)

** OKLAHOMA. 95.5, May 16 at 2015 UT, C&W music undermodulated with some hum, sounding mono but $tereo pilot is on from Enid pirate peaking circa intersexion of Garriott and Cleveland. Long pause between cuts, no announcements (Glenn Hauser, Enid, WOR)

** OKLAHOMA [and non]. Sporadic E on FM is hopping around us, so I bandscan on the caradio, getting none of that, but observing monophony on nearer signals: i.e. no $tereo icon, not going by how they sound as it`s not unusual for $ stations to emit monophonic content, even music. Except for 89.7, correctly mono in WTDFA FMDB per my previous input. This is 1600-1630 UT Sunday May 18:

 89.3, KIEL Loyal
 89.7, KJTH Ponca City, The House -- not noticed mono before, mostly Christian music; anomaly? Yet its relay on 88.5, KZTH Piedmont is $tereo but sounds mono.
 90.3, KHEV Fairview
 92.1, KFXI Marlow - during church service, but always mono, music too
 94.3, KCVW Kingman KS - since it`s Bott // 95.1
 95.1, KQCV-FM Shawnee, Bott, // 94.3, mixed with KICT Wichita $
100.9, K265FL Enid of talker KGWA 960
105.1, KQSB Perry, sportstalk

91.7, KOSU OKC, normally mono all day with NPR/talk, M-F, is in $tereo Sunday in the 16-18 UT hour with music show: `The Toaster Brunch` (Glenn Hauser, Enid, WOR)

** OKLAHOMA. 89.7, May 21 at 2040 UT, $tereo pilot is back on KJTH Ponca City, contrary to my check May 18 (Glenn Hauser, Enid, WOR)

** OKLAHOMA. 102.7, May 18 at 1615, no KJYO signal or only a trace of something, while other OKCs are normal/nominal: 100.5, 101.9, 104.1, etc. (Glenn Hauser, Enid, WOR)

** OKLAHOMA. 102.7, May 19 at 1938 UT, KJYO is on the air unlike yesterday, but seems a bit weaker than other OKCs (Glenn Hauser, OK, WOR)

** OKLAHOMA [and non]. 99.7, May 19 at 2220 UT, ``99-7 The Wolf`` ID,

i.e. KWFF. This frequency was hijacked from Enid to Mustang, SW of OKC, by previous owner, then KXLS calls applied to 95.7 Lahoma instead. But we still have `The Wolf` on 106.3, which is KWOF Waukomis = Enid market. Both country format. How original! WTFDA FMDB lists 117 Wolfs in USA, and one Canadian, 104.9 CFWF-FM Regina, predominantly country but scattering of rockishes. I fail to appreciate how branding radio stations The Wolf accomplish anything positive (Glenn Hauser, Enid, WOR)

** OKLAHOMA. 105.3, May 19 at 1940 UT into caradio, enough signal to be sure it`s MONO, not $tereo, on the ``Infinity Sports Network``, ads including one for Juneteenth with a (405) area code, so it`s not KFBZ In Kansas, but per WTFDA FM Database, KINB, Kingfisher OK, 0.93/0.93 kW, 254.0 m with CBS Sports Radio - different than Infinity? Was rebranded on April 15, 2024 per Wikipedia. So add one more to the MONO survey. I suppose this little station tries to reach part of the OKC Metro. Site is halfway between Kingfisher and Piedmont, i.e. further from Enid, and circular prime contour only reaches NW OKC, not quite to Lake Hefner. I wonder why they could not go to higher power (Glenn Hauser, Enid, WOR)

** OKLAHOMA. RF 13, May 18 at 0238 UT, three of the four OETA channels are black except for lower-right bugs, i.e. they are getting no programming input to put out, -2 World, -3 Create, -4 Kids - while -1 is nominal with main channel movie! Still so for a few minutes, but by 0245 check, they are all back. Storm is hitting OKC, maybe partial power outage or satellite dishes disrupted.

** OKLAHOMA. I`ve been intending to survey all the sub/channels of the OKC TV stations, as the lineups keep shifting - indeed I run across some ``channel`` with names new to me. This is not via the rooftop antenna, but rabbit ears on the second floor which I have very carefully positioned for best/reliable reception of OETA RF 13. This means that some other OKC channels don`t decode without messing with the r-e which I don`t want to do: mainly KWTV 9 RF25, KSBI 52 RF23. BTW, this handy dipole dates from my OKC era 1954-1961y, when they were quite sufficient for local reception. No UHF loop included. These names are read off the PSIP display, not from on-screen bugs which are often different or variant! And note the capitalization and punxuation, which I have copied exactly. This was accomplished around 0240-0315 UT May 18:

RF27:
4-1 KFOR DT
4-2 ANT-TV
4-3 TRUCRM
4-4 DEFY

RF7:
5-1 KOCO-HD
5-2 KOCO-ME
5-3 [skipped]
5-4 Story
5-5 Nosey
5-6 getTV
5-7 Quest

RF15:
14-1 TBN-HD
14-2 Merit [with boxing match?!]
14-3 Inspire
14-4 ONTV4U
14-5 POSITIV

RF17: [Enid`s only]

17-1 K17JI-D [WRONG! FCC says it`s K17JN-D]
17-2 3ABN-PR
17-3 3ABN-DD
17-4 3ABN-ES
17-5 3ABN-KD
17-6 3ABN-PH
17-7 3ABN-IL
17-8 [skipped]
17-9 3ABN-RL Audio only
17-10 3ABN-NR Audio only
17-11 Radio74 Audio only

RF24:
25-1 KOKH
25-2 Charge!
25-3 TheNest

RF25:
9-1 News9 [really KWTV, CBS affil.]
9-2 News9 N [as in Now?]
[on roof antenna; and nothing else]

RF29:
30-1 KTUZ
30-2 QVC
30-3 HSN 2
30-4 QVC-2
30-5 H&I
30-6 StartTV
30-7 MeToons

RF33:
34-1 KOCB
34-2 ROAR
34-3 Comet
34-4 Dabl

RF??: needs further investigation. There is an OKC area transmitter
altho KUOK is supposedly ch 35 in Woodward.
36-1 KUOK

RF19: tuner remembers when KAUT was ATSC 1.0 but cannot tune now that
it`s ATSC 3.0: 43-1, 43-2, 43-3, 43-4.

However alternating virtual 43s go to different RFs!:
43-1 KAUT-DT RF27 like KFOR which owns it
43-2 RewTV   RF24 which is competitor KOKH`s!
43-3 Mystery RF24!
43-4 COZI   RF33 which is KOCB`s!

RF18: breaking up but I manage to copy:
62-1 ION
62-2 Bounce
62-3 CourtTV
62-4 MOVIES!
62-5 BUSTED
62-6 GameSho
62-7 ShopLC
62-8 HSN

One might compare with rabbitears.info (Glenn Hauser, Enid, WOR)

** OKLAHOMA. A bit of area tropo visiblizes a couple more channels to
explore, May 20 at 0440-0445 UT:

RF23, OKC:
52-1 KSBI-HD
52-2 BOUNCE
52-3 LAFF
52-4 GRIT
52-5 ION+ [why isn`t this with ION on RF 18??]

Also the STB remembers some alternate virtuals: 52-1 and 52-2 leading to RF51 where of course there is no signal any longer.

RF28: which is KTPX-TV Okmulgee, Tulsa market; compare to OKC RF 18 in previous report, some match, but not all on KOPX.
44-1 ION
44-2 [skipped]
44-3 CourtTV
44-4 MOVIES!
44-5 Mystery
44-6 GameSho
44-7 QVC
44-8 HSN
(Glenn Hauser, Enid, WOR)

** OKLAHOMA. Tornado season means OKC TV stations blow away a lot of network programming, for often continuous storm coverage. May 19 at 2233 UT, KFOR `4` RF 27 did join NBC Afternoonly News a bit late; while KWTV `9`, RF 25 shunted CBS Afternoon News to its substation KSBI `52` RF 23 Cable 16. KOCO ABC and KOKH Fox also have substations but I`ve yet to find them shunting major network programming to any of those. KFOR could also do that, to KAUT. Or extremely important preëmpted shows can be played in the nightmiddle for recording, such as Jeopardy on KFOR (Glenn Hauser, OK, WOR)

** OKLAHOMA. Some area tropo affects UHF TV, May 21 at 1455 UT. Bad signal on RF 20 briefly decodes with News on 6, which is KOTV Tulsa, and after tuning around I get same on RF 26, which is primary, but how was I seeing same on 20? Rabbitears.info reminds us that RF 20 is KQCW, 19-1, which is a substation of KOTV. Checking KQCW program schedule, yes in fact they put News on 6 on KQCW during that and several other hours. KOTV news stream audio is also on 1170 kHz, now renamed KOTV too, ex-KTSB, ex-KFAQ, ex-KVOO. And 1170 also spews IBOC QRM above 1180, ``jamming`` R. Martí.

Otherwise around 15 UT May 21: NO signal on 17, not a bit on the ``meter`` from local Enid K17JN-D misnamed K17JI-D. Either it is off, or totally QRMed by DX, such as KTEN Ada, OK`s only full-power on 17. Later in afternoon when tropo has burned off, still zero on 17, such as 2330.

RF 29, KTUZ signal is BAD, unusual, must be DX QRM. But there are no other full-powers in OK or KS per FCC LMS. BTW, City of License Shawnee for KTUZ is meaningless, as it`s really part of the NE OKC antenna farm, sharing the very same tower with all these TV and FM:
https://www.rabbitears.info/tower.php?request=site&asrn=1253490
And how can 27 KFOR-TV be only 55 kW ND, while 29 KTUZ-TV is 1000 kW ND? Normally roughly equal signals here (Glenn Hauser, Enid, WOR)

** PERU. 4810 & 4820, May 18 at 0225, JBA carriers vs HSNL, no doubt the Peruvian pair not yet signed off for the night, R. Logos, Chazuta, San Martín, and R. Senda Cristiana, Cotahuasi, Arequipa (Glenn Hauser, OK, WOR)

** SPAIN. 15500 & 15520 S9+20/30 but 15500 sounds a bit louder, 15390 S8/S9, and 17715 S9+10/20, Friday May 16 at 2200, token English from SNR on all four direct, previewing a `special broadcast` about the Eurovision Song Contest, interviewing an EBU guy (Glenn Hauser, OK,

WOR)

** SPAIN. 15500, 17715, 15520, 15390, Mon May 19 at 2200, token English from SNR nominal direct on all four in order of decreasing strength, and precious little else from Europe on these bands. Preview topix: Olive Oil Council meeting in Madrid; Eurovision Song Contest won by Austria (Glenn Hauser, OK, WOR)

** SPAIN. 15500, 17715, 15520, 15390, Wed May 21 at 2200, token English from SNR on all four, previewing something about a festival; news leading something about former Ukrainian leader fleeing (Glenn Hauser, OK, WOR) See also TIPS FOR RATIONAL LIVING below

** TURKEY. 11785.004, May 16 at 2203, VOT English not off the air, but only S8/S9 direct = local noise level, unlistenable. 2254 into UTwente when measured, S9+20/30 s/off and IS first notes barely once to chop before 2255*, no finesse (Glenn Hauser, OK, WOR)

** TURKEY. 11785, May 17 at 2200-2202+, NO signal from VOT English into UTwente, nor accidentalternate 9875. Something`s always erroneous at Emirler (Glenn Hauser, OK, WOR)

** TURKEY [and non]. 9875.005+, Sunday May 18 at 2046, VOT English backwards into UTwente, S9+15, tuned just in time for end of `The Pulse of Turkish Foreign Policy` and start of `The Letterbox Show` - as I have just finished delayed viewing of the #1 TV show, CBS Sunday Morning via website minus commercials, which totals 62.5 minutes. As usual I can only guess at some of the names, while others are repeat attenders. 1) Michael Kovsky? NY, has 11780 Brasil QRM to 11785. 2) Anatoly Klepov, Moskva wants May QSL: he reports every month. 3) Christian Henke?, Germany, visited TRNC and has tried to QSL R. Bayrak, but mail does not go thru; can VOT forward? 4) Mario Peña, Zaragoza, Spain, has monitored Turkish and French, when is Spanish? 5) Jayanta Chakroborty, India, 03 UT broadcast missing but heard next day, better on 7275 aimed at NAm than 6165 toward ME. 6) Orlando?, Taranto, Italy. 7) John Miller, Ochlocknee? Georgia, reports ``11875``. 8) Hideki? Miyaki? Japan, heard Chinese at 1100 on 17620, et al. tentatively VOT. 2105 wrapup; says 5/19 is Atatürk Day, 2106 plays children`s choir with patriotic song. 2109 outro theme.

Don`t need to hear 2200 on 11785.006, but confirmed on at 2229 check, S9+45 into UTwente, when I hear that Georgia town better (Glenn Hauser, OK, WOR)

** TURKEY. 11785, May 19 at 2158, VOT not off the air but JBA direct equal to noise level (Glenn Hauser, OK, WOR)

** TURKEY. 11785.006, May 20 at 2159, VOT not off the air, IS & English IDs, S9+10 direct but not enough vs local hi noise level. At 2248 into UTwente when measured, S9+20/30 of music. 2252 ``with-you-every-hour`` promo. 2253 s/off as if it`s the 1230 on 17620, awry at Ankara, and first notes of IS once before chop, no finesse, erroneous at Emirler (Glenn Hauser, OK, WOR)

** TURKEY. 11785, May 21 at 2159, 2215 direct, VOT no signal; nor at 2253 into UTwente, nor on accidentalternate 9875, tho that would have WTWW splatQRM. Something`s always erroneous at Emirler (Glenn Hauser, OK, WOR)

** U K [non]. 11725, May 21 at 0602, S9/+25, BBC news relay via RNZP again here instead of sked 13690, the booming voice of Neil Nunes, who originated in Jamaica; and again the SSOB and if it were not for JBA 11700 France, OSOB (Glenn Hauser, OK, WOR)

** U S A. 4758.5, May 17 at 0603 as I am bandscanning a CODAR ID fires

twice, too fast to copy, but starts with WR-, then resumes swirshing. As in my previous log of *2023y*: ``UNIDENTIFIED. 4741.5, Oct 9 at 0643, as I happen to be here during a routine bandscan, CODAR ID fires two times, starting with WR, probably WRPW597 as reported extensively last Feb 10/11, from the MS/AL/FL Gulf coast, so still every icosaminute at :03, :23, :43. I think the IDs are not ordinary CW, but just as wideband as CODAR itself, which paused during IDs`` (Glenn Hauser, OK, WOR)

** U S A. 8992 USB, May 21 until 1437, US military crypto message exercise concluding with ``Automatic, out``. Punxuated by irregular noise bursts, rather like thunderclaps, which I think are intentional among different types of self-imposed QRM; first heard on much weaker 15016 USB (Glenn Hauser, OK, WOR)

** U S A. 28200.5 CW, May 16 at 2204, rapid beacon beginning with NST DE - not copied rest but no doubt N4WLO/B in Theodore AL as in May 13 log. But what does NST signify starting a marker? (Glenn Hauser, OK, WOR)

** U S A. ``Hi Glenn! I have been trying to log N4WLO/B on 28200.5 kHz for the past several days to confirm the message he is sending, but I have been unable to due to the poor conditions. When I first logged the beacon back in August 2024, the operator was just sending a series of dits with a short break in between, and his callsign once every ten minutes. A couple of weeks ago, several listeners reported to the hfbeacons list that his message had changed. They reported that he was now sending “TEST DE N4WLO/B”, so “TEST” is likely what you heard as “NST”. Whether it was the rapid speed of the code or imperfect keying, “TE” could easily sound like an “N”. Steve Howe, Saint Albans, VT`` I bet that`s it; tnx (Glenn Hauser, OK, WOR)

** U S A. Just in from our VOA informant, May 15 at 2020: ``I just got notice that all PSC employees are terminated effective May 30. I guess this is the end. PSC means personal service contractor. All the worker bees at Greenville are PSC`` (Glenn Hauser, OK, WORLD OF RADIO 2295)

** U S A [and non]. WORLD OF RADIO 2294 monitoring: confirmed UT Thursday May 15 at 0130 on WRMI 5010, S9+5 into Maryland SDR.

WORLD OF RADIO 2295 contents: (Ascension), Australia, Azerbaijan non, Brasil, Chad non, Cuba and non, Europe, Germany, Indonesia, (Korea North non), Kurdistan non, Luxembourg, Myanmar non, Namibia, Perú, Romania, Saudi Arabia, Spain, Sweden non, (Taiwan), Turkey, (UAE), UK, USA, (Yemen non); propagation outlook - (countries mentioned along with others not in order)

(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2295 monitoring: confirmed UT Saturday May 17 at 0300 on WTWW 5085. The switchover from Ancient

Word Radio programming to me is never quite exact; we heard this smooth transition: ``You are listening to the ministry of Glenn Hauser with World of Radio 2295...`` Hmmm, yes, I`m a ministry! S9+10 into NH SDR I happen to have running, where there are some storm crashes. At 0329 music fill until 0333.8* chopoff with no announcements. Tnx, George, for getting us on the WTWW air again.

Also confirmed Saturday May 17 at 1431 on SW Radio, Germany, 6160.001, S8/S9 into UTwente.

Also confirmed Saturday May 17 at 1600 on WRN North America stream.

Also confirmed Saturday May 17 at 1734 the 1730 on SW Radio, Germany, 6160.001+, S9/+10 into UTwente; and 3975.001, S8/S9.

Also confirmed Saturday May 17 after 1930 on WRN North America stream.

Also confirmed Saturday May 17 at 1936 about 3 minutes into so started circa 1933 on WA0RCR, 1860 AM, Wentzville MO, JBA S6 vs noise level into Jerseyville IL SDR.

Also confirmed Saturday May 17 at 2007 on WRN Europe stream. Next:

2230 UT Saturday WRMI 15770 to NE [NEW];
2300 UT Saturday WTWW 9475 [suspended];
0230vUT Sunday WA0RCR 1860-AM [nominal 0315; as late as 0400];

2100 UT Wednesday WBCQ 7490v to WSW;
0130 UT Thursday WRMI 5010 to S;
1630 UT Thursday SW Radio, Germany 6160.
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2295 monitoring: confirmed Sunday May 18 at 2155 the 2130 on SW Radio, Germany, 3975.002+, S9+10 into UTwente.

Also confirmed Sunday May 18 at 2330 on WRMI-11, 9455, S9+20/35 into S Texas SDR, VG for us, NW across the continent. Skedgrid finally shows this correctly on System D, not 7570 or 7780.

Also confirmed UT Monday May 19 at 0030 on WRMI-13, 7780, S9+10/30 into S Texas SDR.

Also confirmed UT Monday May 19 from 0305 on Area 51 webcast only as previous program ran over; while WBCQ 5130 cut off at 0302*.

Also confirmed Monday May 19 at 1953 the 1930 on SW Radio, Germany, 6160.001, S9+10/15 and on 3975.002+, S8/S9, both into UTwente. Next:

0330 UT Tuesday WRMI 7780 to SW;
1300 UT Tuesday WRMI 9955 to SSE [also web-, phonecast];
1400 UT Tuesday WRMI 9955 to SSE [also web-, phonecast];
2000 UT Tuesday IRRS 1323-Italy;
2330 UT Tuesday WRMI 9395 to NNW;
2330 UT Tuesday SW Radio, Germany 3975;
1930 UT Wednesday SW Radio, Germany 3975 & 6160;
2100 UT Wednesday WBCQ 7490v to WSW;
0130 UT Thursday WRMI 5010 to S;
1630 UT Thursday SW Radio, Germany 6160.
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2295 monitoring: confirmed UT Tuesday May 20 at 0330 on WRMI 7780, S9+20/30 into S Texas SDR.

Also confirmed Tuesday May 20 at 1300 on WRMI 9955, S9+15/30 direct. Immediately follows music at end Slovakia relay in Spanish, no ToH ID.

Also confirmed Tuesday May 20 at 1422 the 1400 on WRMI 9955, S9/+5 direct.

Also confirmed Tuesday May 20 at 2004 the 2000 on IRRS SW via AM Italia, 1322.995, S8 and noisy into UTwente. Next:

2330 UT Tuesday WRMI 9395 to NNW;
2330 UT Tuesday SW Radio, Germany 3975;
1930 UT Wednesday SW Radio, Germany 3975 & 6160;
2100 UT Wednesday WBCQ 7490v to WSW;
0130 UT Thursday WRMI 5010 to S;
1630 UT Thursday SW Radio, Germany 6160.
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2295 monitoring: ``Richard Lemke, St. Albert, Alberta, Canada, the desk of Richard’s listening Post, Radio: JRC NRD-535 HF (30 years of service), Antenna: random long wires in the trees. World of Radio #2295 [WRMI:]
9455 static QRN, QSB Fading, 2330, 2345 (45343), 2358, May 18 UTC 2025

[sic: was Sunday May 17]
9395 kHz, static QRN, S7 signal, 2332, 2345, 2358 (45433), 2359, May 20 UTC 2025 [Tue] (Lemke, Richard -AB)``

Confirmed Tuesday May 20 at 2330 on WRMI 9395, S9+20/30 into Georgia SDR.

Also confirmed Tuesday May 20 at 2331 on SW Radio, Germany, 3975.002, S9/+10 into UTwente.

Also confirmed Wednesday May 21 at 1931 on SW Radio, Germany, 6160.000+, S9+10 and 3975.002-, S9/+10 both into UTwente.

Also confirmed Wednesday May 21 at 2100 on WBCQ 7490 -76 Hz = 7489.924, S3/S6 into NH SDR. BTW, tuning in early at 2056, it`s *still* TOMBS instead of what used to precede and still shown on sked, `Pirate Joe Extravaganzo` - not extravaganza, which would be feminine. TOMBS has no built in breaks at hourtops, so he has to be chopped off at 2059.5 for WBCQ promo and ID. Next:

0130 UT Thursday WRMI 5010 to S;
1630 UT Thursday SW Radio, Germany 6160.

Thanks this week for generous financial support from Peter Robinson, Preston UK, via PayPal to woradio at yahoo.com

One may also contribute by MO or check on a US bank to Glenn Hauser, PO Box 1684, Enid OK 73702 (Glenn Hauser, OK, WOR)

** U S A. 17790, May 16 at 1452, interview with a preacher referring to ¿ moiradio@gmail.com, 9th Street Church of Christ, S7/S9 direct. In B-season there was an overlap on 17790 between RRI and WRMI, but HFCC A25 still shows WRMI starting at 1500, until 2100; and now the collision would be with Vatican Radio to S Asia in language segments, including Tamil at 1450-1510, but no sign of that here. WRMI`s own sked still claims WRMI-7 on 17790 starts at 1500 with Radio Africa Network still aimed 160 degrees at S America instead. Did they move it up to *1400 during DST without telling us? There can`t be too many ChoChs of that name? but search leads to Paducah KY, Fort Smith AR, Ballinger TX, Deming NM, plus some others on a 9th street at some intersexion. It`s the SSOB if not the OSOB (Glenn Hauser, OK, WOR)

** U S A. 5800, UT Sun May 18 at 0220, WRMI with talk about ham radio. O, this axually matches the sked for WRMI-11 on System D: `CQ Calling` at 0215-0230 UT Sundays. Entire hour on Tue-Sat is R. República (Glenn Hauser, OK, WOR)

** U S A. 9455, May 18 at 0645, unusually this WRMI-11 is ON, S9+30 direct, with SMTV // 9395 which is only S9+20. Maybe 9455 will finally still be running System D during the 0900-1000 hour, including WOR Saturdays at 0930?? System E TOMBS supposedly also 9455 daily 0800-0900. Xmtr grid still shows 9455 only at 2300-0400 (Glenn Hauser, OK, WOR)

** U S A. 9455, May 19 at 0539, this WRMI-11 is off again, so last night`s expansion was anomalous. It`s also off at 0052 May 20 during its nominal 00-04 schedule (Glenn Hauser, OK, WOR)

** U S A. 9955, May 20 at 2205, WRMI anomalies: this frequency missing; 9455 is on, S9+20/30 direct, M&W discussing dress, athletix, Oral Roberts. 9395 weaker and undermod, sounds similar but not // (Glenn Hauser, OK, WOR)

** U S A. 5085, May 16 at 0240, WTWW sounds distorted via this remote: http://kx4az1.proxy.kiwisdr.com:8073/

Checked since Arthur Pozner queried at 0238: ``[WOR] Is 5085 kHz having a modulation drift on the Lower Sideband?`` (Glenn Hauser, OK, WOR)

** U S A. 5085, WTWW: George McClintock says he`s all set to air WORLD OF RADIO this week, UT Saturday May 17 at 0300. Meanwhile is awaiting delivery of a tube for the other transmitter costing $23,000, tnx to TOMBS paying its bill (Glenn Hauser, OK, WOR)

** U S A. 5085, May 18 at 0226, WTWW is off again, 24 hours after it was on again (Glenn Hauser, OK, WOR)

** U S A. 5085, May 20 at 0158 & 0228 chex, this WTWW is on again and so is the other transmitter 5920. Still no sign of 9475, the daytime counterpart of 5085 (Glenn Hauser, OK, WOR)

** U S A. 9930, May 21 at 2204, WTWW at first with dead air, then TOMBS modulation, extremely strong. Even before mod started I was hearing splatter spurs, as well as the usual parasites plus and minus 12.9 kHz from center. The splatter beyond sort of peaks at multiples of that, tho very diffuse/broad. Some peaks circa 9872, 9859, especially 9846, 9808; upper around 10005 severely QRMing WWV! Once there is talk modulation, on a second receiver I match the peaks to 9930 and NOT 9980 WWCR which is also TOMBsing but never synchronized. Also match during music bits. I detect the splatter as far down as 9600 and as far up as 10250 very approximately. Meanwhile I emailed George by 2225 urging him to close down immediately. Probably did not get my message right away, altho abated slightly, but still there around 9846, 10050; and at 2305 around 9846, 10015. At 2323 check, 9930 is still on but dead air again; turned off at 2327. Back on at *2328.7 OC. 2330.7 resume TOMBS, shortly back to dead air. Making adjustments, I guess. 2335 off again. *2342 cut back on with TOMBS immediately, still broad splatter peaks circa 9846, 10015. And so it goes (Glenn Hauser, OK, WOR)

** U S A. Pre-`AAAWWW` WBCQs monitoring May 16 at 2354 into Maryland SDR: 7490 -71 Hz = 7489.929 S9+15 with FKB. 9330 WLCR PP S9+15/25. 5130 -85 Hz = 5129.915 IS & IDs from 2355. 6160 -72 Hz = 6159.928 othermx S8/9+10. 3265 off but strange QRM/N. Then I switch to NH SDR: 5130 -83 Hz = 5129.917, S9/+15 IS & ID. 3265 off. 6160 -71 Hz = 6159.929 S9+10. 7490 -70 Hz = 7489.930 FKB S8/9+10. Precise frequencies are exactly as displayed without trying to correct them.

0000 UT May 17 on 5130v Allan exclaims ``when in doubt start punching buttons``, and `WTO` theme, talkover ``ya know it is a really [illegible] thing``. And single word interjexion ``paper``. Brings up Angela on phone after usual fumbling. Yes, paper is tonight`s theme on this totally unprepared show. Has backache from working on a forklift all day. It`s getting windier in northern Maine. 0006 Freddy interrupts already with phone call; asks if Angela is in Florida - they won`t say for security reasons. I confirm is trimulcasting on 5/7/9 MHz frequencies; 0053 reading pirate logs of Free Radio Weekly #1520, which is last week`s issue - as if it just arrived. At 0100, 5130 cuts to music before he is finished. I switch to 7490, and he`s still going, plugging On the Media this week about Katie`s visit to WBCQ; and mandatory prayer, sorry, Hal Turner will have to wait. 0103 finally JIP that show (Glenn Hauser, OK, WOR)

** U S A. 9346.04 AM, May 18 at 0214 JBA talk, S9+10 vs HSNL direct into the R75: but I can match the mod to 9330 WBCQ WLCR English into the handy PL660 with no external antenna. First time I`ve heard such a spur out of the SuperStition. Match 16+ kHz below? NO trace of any circa 9314. 0233 recheck, now it`s drifted to 9346.09 or so. Something`s messed up at Monticello (Glenn Hauser, OK, WOR)

** U S A. 17525, haven`t run across WMLK here for weeks in random afternoon bandscans; is totally unused? HFCC A25 registered 1730-2230 daily except Sabbathdays. Mostly heard mornings on 15150, some evenings on 9275. Last logged March 6-7-8 by myself and others when at first it was putting out 8X kHz spurs (Glenn Hauser, OK, WOR)

** U S A. 660, May 16 at 0603 UT, Navajo chanting as KTNN AZ is again failing to null toward WFAN NYC as required (Glenn Hauser, OK, WOR)

** U S A. 1010 kHz, May 18 at 0229 UT in bandscan vs HSNL around here, ad for Florida homeowners from Florida Pest Control. Gee, could this be from Florida? Yes, WJXL Jaxonvil Beach *still* way out of whack, U4 50/30 kW, day and night patterns supposed to throw it all out eastward into the Atlantic. Surely the easiest way to DX Fla on MW without really trying. Is better on my E/W loop than N/S shortwire. As I last logged it in early March (Glenn Hauser, OK, WOR)

** U S A. 1650, 1640, 1620 kHz, May 19 at 0600 UT, stupid sportstalk as I tune downward, slight delay from 1650 to 1640 and a bit longer delay on 1620, as network feeds are seldom synchronized from one affiliate to another, i.e.: FSR on 1650 KCNZ Cedar Falls IA, to 1640 KZLS Hennessey/Enid OK, to 1620 KOZN Bellevue NE (Glenn Hauser, OK, WOR)

** U S A. Another fruitless search for Es FM DX bouncing over and around us per maps: Kansas GW/tropo is still up, possibly blocking any `openish` channels, but some obs of note, May 15:

93.5, at 0157 UT ``Power 93.5, Wichita`s #1`` and at 0202 adding ``#1 for hip-hop and more``. WTFDA shows KDGS Andover KS, 15/15 kW, 114 m HAAT, format Rhythmic CHR. Ordinarily the KS I get on 93.5 is the further KKDT Burdett, 95 kW, 304.8 m, 248 km/154 stmi.

89.5 is an `open` frequency here between ACIs, usually nothing at all audible, but at 0155 UT a program outro is JBA but steady for ``Somebody Loves You Radio``, address in California, mention CSN so presumably a CSN = Calvary Satellite Network station. i.e. a relay of KAWZ 89.9 in Idaho. Likely one of these three closest:
K208CG OKC 0.25/0.25 kW; K208GR Wichita 0/0.25 kW; or KJCC Carnegie OK 23.5 kW, 118.8 m, 157 km/98 stmi (Glenn Hauser, Enid OK, WOR)

** U S A. 98.3, May 21 at 2040 UT, dead air in $tereo, presumably my otherwise near-local KQZQ Kiowa KS, home of Scott Becker, 97.0 kW ERP, 208.9 m HAAT (Glenn Hauser, Enid OK, WOR)

UNIDENTIFIED. 630.04 approx., May 16 at 0605, JBA het against gospel huxter on 630.0, no doubt KYFI St Louis MO. Remember when it was rocker KXOK? (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 810.60 approx., May 20 at 0643 UT, mystery JBA carrier hetting 810.0 WHB. Its exact frequency varies a little from one log to the next (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 1030 kHz, May 20 at 0645 UT, nothing but noise. Sounds like regular AM being fed noise and emitting it, rather than IBOC or anything else (Glenn Hauser, OK, WOR)

UNIDENTIFIED. ``Hi Glenn, It took a while, but I believe I can rule out your 1549.82 carrier as being XEREL Morelia. I've attached an AVI file that is from my recording of 11 May 2025 near local sunrise, when the path between my home and Morelia was still in darkness. You can hear the Mexican anthem weakly in the recording and notice that no signal peaks are in the 1549.8-1549.9 range. I did not hear an ID, but XEREL is the only known Mexican on 1550 in the UTC-6 time zone.

It is possible that another Mexican has recently become active on 1550, perhaps XECCAW in Jalisco, and that is the station playing the anthem. In that case, though, XEREL is putting in virtually no signal for me at 88 miles/142 km away. They have never been strong here despite being on a wide-open frequency, and my suspicion since you queried me about their signal is that the only way they will get to Oklahoma is with a plane ticket. 73, Mike Jeziorski, Qro.``

Tnx, Mike. Well, I would settle for Perú instead, hi (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 4850, May 15 at 0639, JBA carrier like 3 nights earlier, probably Euro pirate as others were hearing modulation via Ireland remote (Glenn Hauser, OK, WORLD OF RADIO 2295)

UNIDENTIFIED. 4849.94, May 17 at 0607, that JBA carrier again, suspected to be Europirate, but have my doubts as it`s past sunrise all over Europe, 0341 UT in Amsterdam, even 0522 UT in Lisboa. Have seen no current reports of it from Europe. But searching HFUnderground on 4850 gets plenty hits; a few more recent ones from this year under the European Pirates and Private Stations category, but in evenings:

``Ray Lalleu, Moderator, Marconi Class DXer, Western part of France: Re: Zender Akenzo 4850 AM 1922 UTC 19 JAN 2025: « Reply #1 on: January 19, 2025, 1933 UTC » on 4850.0 1931 D song, then unk. music. 2029 duo talking in D, ID as Contikenzo, // with 5840, 2031 rock``

``Ray Lalleu: Zender Akenzo 5840 AM 0848 UTC 19 JAN 2025 « on: January 19, 2025, 0848 UTC » on 5840.0 0848 D music ID : see below. ... day long ... 1815 charleston. 1851 transe music, 1852 song (in D?), slight 50 Hz hum, 1856 rock, 1859 ID as Contikenzo, D music. 2030 // with 4850``

``Ray Lalleu: Re: Contikenzo 4850 AM 2005 UTC 02 MAR 2025 « Reply #1 on: March 02, 2025, 2039 UTC » on 4850.0 2038 D or G music, // with 5800. 2308 junior singer in G, // with 5800``

``kris, Marconi Class DXer, N. Poland: Re: Contikenzo 4875/4850 AM 2043 UTC 23 MAR 2025 « Reply #1 on: March 23, 2025, 2121 UTC » 2117 S9+30 Let's go all the way Sly Fox. 2119 during song QSY 4850 next known DJ confirmed ID, polka 2124 ID, some rascal plays them a 1.7 kHz carrier below, Now I'm here Queen. 2132 5800 S9+25 both channel Twist and shout The Beatles`` (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 4849.95 approx., May 18 at 0638, JBA carrier direct, pirate? But too late for Europe? See previous report (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 6110, May 18 at 0224, JBA carrier. Fana, Ethiopia should not be on until 0255 or 0300. EiBi & Aoki agree TIBET is on 6110 now, but it`s mid-morning there. Aoki also shows R. Delta, Holland but not until 0600 (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 6938.0, May 19 at 0556, JBA carrier again, cf yesterday`s report: ``NORTH AMERICA. 6938 AM, May 18 at 0208 and still 0232, open carrier vs HSNL; at least I can`t make out any mod if it be a pirate? Nothing now reported in HFU, tho lots of older logs, unIDs, USB or AM``

To which Walt Salmaniw, BC replied: ``Glenn, I often hear this OC in Masset, but always assumed it was somehow connected to my Bodnar mini-GPS that does put out some spurs. I've never seen any modulation associated with it. 73, Walt``

Well, I don`t have a Bodnar mini-GPS, whatever that be, so really

think 6938 be external to both of us. Should appear on various remotes (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 15120-15145 approx., May 20 at 2202, OTH radar clickery, vs no broadcasters but condx are awful. See also MOLDOVA (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 105.3, May 15 at 1711 UT into caradio, dead air seems here, a tight squeeze between 105.1 & 105.5 stations. Could be either. KINB Kingfisher OK 0.93/0.93 kW, 254.0 m CBS Sports Radio; or KFBZ Haysville KS [suburb SW of Wichita]. 98.0/98.0 kW, 307.0 m, The Buzz, Top 40 (Glenn Hauser, Enid OK, WOR)
